

OxyFoam[®]

ActiveFoam to clean & prepare the teats before milking

- ▲ ActiveFoam for a premium clean
- ▲ Empowered blend of exfoliants & emollients for premium teat condition
- ▲ Easy, quick & efficient to apply, clean and dry

APPLICATION

OxyFoam[®] is used ready to use foaming product. Fill the reservoir of the foam cup 2/3 full and shake. Make the foam rise by squeezing gently in succession on the reservoir. The foam is ready for use on the teats. Apply and allow to act for 30 seconds and then wipe.

PREMIUM FEATURES

The ActiveFoam formed by OxyFoam[®] fully covers and adheres to the surface of the teat and allows for an easy yet thorough cleaning. OxyFoam[®] has a complex dermatological fraction that softens, invigorates and relaxes the skin of the teats.

BENEFITS

OxyFoam[®] is a premium deaner and conditioner formulated to fully prepare the teats ready for milking. OxyFoam not only thoroughly cleans the teats, protects the teats from mechanical challenges during the milking process and is formulated to stimulate milk let down.

LOGISTICS

Packaging:	20kg	210kg
Product code:	2246400	2334240
EAN code:	402816 2246407	402816 2334241
Pallet Size:	24 cans	4 units

SPECIFICATIONS

Product name :	OxyFoam[®]
Physical Form	Liquid
Active Substance	Lactic Acid
Fragrance	Bloomy
pH Value	2,7±0,3
Storage Temp.	0°C – 30°C

Welcome!!

Modern farming regimes rely on a knowledge-intensive production process with a high degree of efficiency and professional management. Modern farming also requires high standards of hygiene with a particular focus on infection control and the prevention of cross contamination. For the farmer, tailored bio-security and hygiene solutions are vital for a farm's sustainable success.

For many years, Ecolab has been the trusted partner of the farming community throughout the world. We are committed to developing and delivering individual solutions that meet our customers' exact requirements in an effective, efficient and economical way. Our specific products have been designed to:

- Protect animal health and improve animal welfare
- Increase farm output and control or reduce costs
- Protect the quality of the produced product and ensure a higher degree of Food Safety
