

PhytoShield®

Natural and dynamic Shield to clean and protect teats after milking

- ▲ Formulated with natural herbal extracts and Lactic acid
- ▲ Active polymerising Shield
- ▲ Astringent properties accelerating the closing of the sphincter in the teat canal

APPLICATION

PhytoShield® is used neat. Fill the reservoir of the dipping cup and apply on the teats after milking. Do not wipe. Prevent cows from coming into contact with bedding material until product is dry.

FEATURES

The vibrant green polymerizing Shield formed by PhytoShield® protects the teats from physical challenges from one milking session to the next. The formulation enables easier cleaning at the next milking.

BENEFITS

PhytoShield® provides dual protection at the entrance of the teat canal with its superior shield technology. The polymers in PhytoShield® have been specially selected to let the skin breathe without blocking metabolic exchanges. Thanks to its unique stringent properties, PhytoShield® accelerates the closure of the teat canal reinforcing its action against any difficult environment.

Welcome!

Modern farming regimes rely on a knowledge-intensive production process with a high degree of efficiency and professional management. Modern farming also requires high standards of hygiene with a particular focus on infection control and the prevention of cross contamination. For the farmer, tailored bio-security and hygiene solutions are vital for a farm's sustainable success.

For many years, Ecolab has been the trusted partner of the farming community throughout the world. We are committed to developing and delivering individual solutions that meet our customers' exact requirements in an effective, efficient and economical way. Our specific products have been designed to:

- ▲ Protect animal health and improve animal welfare
- ▲ Increase farm output and control or reduce costs
- ▲ Protect the quality of the produced product and ensure a higher degree of food safety

A visit from your Ecolab representative can help to improve your operations!
