

Simplified Food Safety and Quality for Food & Beverage Manufacturers

The Ecolab FSQ Supervisor Platform is outcome-based technology that simplifies food safety and quality for food & beverage manufacturers looking to increase sellable product, reduce testing costs, mitigate recall risks and streamline regulatory compliance.

SIMPLIFY DIGITAL TRANSFORMATION

Take a phased approach to deployment with our scalable platform that allows you to selectively deploy modules at a pace that aligns with existing workflows — so there is less disruption, faster onboarding for users and a shorter path to ROI.

PROTECT YOUR BRAND REPUTATION

Get the visibility and insights you need to reduce the risk of quality issues that can result in recalls, impact consumer health and drive significant unplanned expenses.

ARM SENIOR LEADERS WITH BETTER ANALYTICS

Use interactive dashboards to allow individuals from various departments to view the insights that matter most to them — and easily share that data with stakeholders across sites.

EMPOWER A CHANGING WORKPLACE

Access previously buried data to provide real-time alerts and interactive process guides to ensure new workers are able to perform their jobs in the right sequence and track results effectively.

ENHANCE MARGINS

Get the information you need to increase sellable product through highly visual, real-time representations of all your manufacturing processes. See what's happening in your operations now — and what trends are taking shape.

TRUST IN ONGOING SUPPORT FROM ECOLAB EXPERTS

Ecolab has a long tenure in the food & beverage manufacturing space. The enhancements on our product development roadmap will ensure our web-based platform grows with our customers advancing digital needs.

Go digital without the stress

THE PURPOSE-BUILT PLATFORM FOR FOOD & BEVERAGE MANUFACTURERS

Our 100% web-based platform unlocks the full value of data from food & beverage manufacturing operations and provides a new generation of analytics.

✓ Environmental Monitoring

Record sampling and testing to evaluate overall environment for pathogens, spoilage and indicator organisms and allergens.

✓ SOP Management

Provide workers with complete instructions for all critical control points, including pre-op steps, cleaning, inspections and reporting.

✓ Reporting

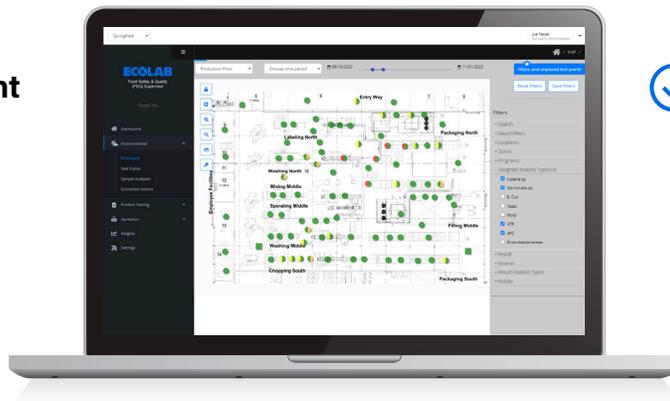

Ingest company-wide data from manufacturing processes and automatically generate reports for audits and routine quality reports.

✓ Test Point Management

Automated tools for adhering to testing standards, such as ISO 17025; demonstrate operational competence and the validity of electronic testing results.

✓ Floorplan Visibility

Enables an interactive birds-eye view of sample points in a facility and automated tools for optimizing and monitoring various floorplan configurations.

✓ Interactive Dashboards

Create individualized reports for authorized users that highlight immediate issues and provide strategic insights for longer-term planning.

✓ Strong Security

The web-based FSQ Supervisor platform includes the latest data security features to ensure your data is protected — with authorized access configured at a user level.

Let's simplify the future of FSQ. Together.

Digital transformation does not happen by simply deploying a software platform. Success requires ongoing change management and the agility to adapt your platform and processes in real-time. Ecolab surrounds our platform — and our customers — with this essential expertise.

Ready to try our outcome-based platform that simplifies FSQ digital transformation for food & beverage manufacturers? Contact your **Ecolab representative** today to learn more.
