

Coronavirus (COVID-19) Action Plan

Public health officials have identified a new coronavirus (SARS-CoV-2). Focusing on standard infection prevention procedures and on accurate environmental hygiene practices will help keep your farm safe. Together, we can help combat the spread of COVID-19.

What are the implications for farms?

Standard infection prevention procedures in the milking process are not enough if not supported by accurate environmental hygiene practices. Environmental hygiene helps to prevent the risk of cross-contamination, coming from the external environment or from internal contamination vectors.

TAKE ACTION

3 EASY STEPS:

- 1 Clean and disinfect everyday walls and floors of the milking parlor and of the milk storage room, milking clusters and calves' cages using foaming or non foaming products**
- 2 Clean and disinfect frequently hands and forearms, especially in the absence of disposable gloves. If non-disposable gloves are used, clean and disinfect them as well.**
- 3 Clean and disinfect the soles of the footwear when entering and leaving each area of the farm or use disposable shoes covers**

SOLUTIONS

ECOLAB COVID-19 RANGE

FOAMING PRODUCTS

Foaming products are ideal for large surfaces and can be easily applied with specific foaming equipment. Foam helps in cleaning and disinfecting the areas even with no or low mechanical action.

TOPAX 66, TOPAX 91, TOPACTIVE OKTO, INCIMAXX T, INCIMAXX DES N

NON-FOAMING PRODUCTS

Non-foaming products are ideal for small surfaces like desks where a mechanical action can be easily applied. They can be used also to clean and disinfect footwear.

ALCODES, ALCODES MAXI WIPES, DRYSAN OXY, DRYSAN OXY WIPES, OXYDES RAPID, OXYDES MAXI WIPES, ASEPTOSTAR, ASEPTOSUPRA, ASEPTOFORCE

HAND SOAPS AND DISINFECTANTS

Detergents can be used before disinfection to help removing the visible dirt and maximize the effect of the disinfectant. In this way, the efficacy of the disinfectant can be assured.

EPICARE 5C, EPICARE DES, MANODES GP, MANODES LI, SPIRIGEL COMPLETE

Use biocides safely. Always read the label and product information before use. Not all Ecolab products are available in all countries.

For information about availability of a specific product, please contact an Ecolab dealer in your country.
